## About Room Viewer

You can create event layouts that will dazzle your clients using either one of the Room Viewer products (Standard or Pro). Room Viewer is an intuitive software that requires only minimum training since it is user friendly and simple. Make your event planning an exciting and profitable experience right from the start.

## History

The Tustin, California based TimeSaver Software, which was founded in 1993, is the developer of this cost-effective, easy-to-use software productivity tools for hospitality professionals.

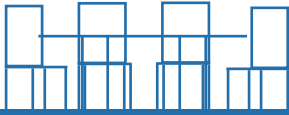

*“For most of my career life in the hospitality industry, I have used pencil and paper to draw diagrams of the events I produce. Eight years ago, I thought that we should be able to produce these event layouts more efficiently using computers.”*

*Room Viewer is the result of many years of research and development. It is very easy to use and allows hospitality professionals to quickly create professional diagrams both for their clients and hotel set-up staff. This offers a unique opportunity for communicating the exact way for laying out a room for planners and hoteliers. This gives companies, which sell space and rent audio video equipment, the ability to increase sales.*

*With over 4,000 users worldwide, this software has many fans to generate automatic layouts.”*

*Sandy Simon  
President and Founder  
TimeSaver Software LCC*

### Who should use Room Viewer?

- q Meeting and Exhibition Planners
- q Catering, Event and Trade Show Managers
- q Food and Beverage Personnel
- q Executive Chefs
- q Teachers and Educational Trainers
- q Restaurant Operators and Managers
- q Sales and Marketing Professionals
- q Architects and Designers

### What industries can benefit from Room Viewer?

- q Hotels, Resorts, Casinos and Catering Operations
- q Convention, Meeting and Exhibition Centers
- q Cruise Ships and Ferries
- q Schools and Training Centers
- q Restaurants, Bars and Entertainment Facilities
- q Sports and Event Halls
- q Design and Development Departments
- q Production Houses and Creative Organizers

## I. Turn Client Proposals into Client Business

Presenting accurate and professional-looking diagrams to your clients is a must to stay competitive. The quality diagram produced with Room Viewer shows clients how their event set-up will appear. Once the client gives his approval of the preferred set-up, the diagram is then passed on to people setting up the event. The accompanying Event Inventory Report then tallies the exact items required to set up the function space. No more guess work!

## II. Quick, Easy, and Cost-Effective

Designed by a meeting professional for ease of use, Room Viewer offers a quick, easy and cost-effective way of preparing event diagrams. Room Viewer makes site selection easier by quickly calculating "best fit" options, such as the maximum number of seats a particular room can hold. Even if you can't be on-site to manage the event, the Room Viewer's diagrams reduce the communication gap by showing the facility of what you have in mind. It would allow people, who set up the event, to do it exactly according to your specifications.

## III. What Room Viewer can do?

- q It doesn't matter whether you are **indoor** in a meeting room or **outdoor** in a tent — Room Viewer can create a diagram for you.
- q Handle any layout even in odd-shaped spaces. Using Room Schematic™, an optional enhancement to the Room Viewer Pro, you can create event spaces of any shape. Both Room Viewer Standard and Pro use these schematics to automatically generate diagrams that lay out your set-up, while avoiding obstacles in the space, such as columns, poles, counters, and others.
- q By answering simple questions on the unique fill-in-the-blanks Event Room Data Form, Room Viewer can do 95% of the work automatically. All the basic elements for creating event space layouts are provided. Drawings can be created for meetings, banquets and many other functions.
- q Within the Event Layout Screen, you can use the convenient shape tool bar to insert shapes both inside the event space and outside the pre-function area.
- q By placing dimensions on your layouts, Room Viewer can assist in communicating important distances. It offers standard dimensions to indicate room and aisle sizes or you can draw your own lines and the software will calculate and display the distance. For event planners that handle international events, simply tell Room Viewer to change the measurements in either Metric or English system.
- q With one click of the mouse, you can convert your banquet diagrams from full rounds to crescent style seating arrangements for better viewing. You can even use Room Viewer to automatically add cross aisles in your theater or school room sets.
- q This software is even smart enough to warn you when you have violated the fire safety codes.

# Features

| Room Viewer                               | Standard | Pro |
|---|----------|-----|
| Event Room Data Form                      | X        | X   |
| Room/Aisle Dimension Lines                | X        | X   |
| Text Labels                               | X        | X   |
| Rotating Shapes                           | X        | X   |
| Zoom                                      | X        | X   |
| Automated Audiovisual and Stage Placement | X        | X   |
| Metric/English Units of Measurement       | X        | X   |
| Room Features' Shapes (Doors, etc.)       | X        | X   |
| Using Odd-Shaped Spaces                   | X        | X   |
| Seating Styles Included*                  | 7        | 7   |

| Event Inventory Report                    | X        | X   |
| Shape Editor (Custom Shapes)              |          | X   |
| Diagrams in Color                         |          | X   |
| Room Schematic™ Interface**               |          | X   |

\* School room, Theater, Banquet, U-Shape, Hollow Square, Conference and Custom seating styles.

\*\* Room Schematic is an optional enhancement to Room Viewer Pro that creates permanent schematics of event spaces.

## The right software package for your needs

### I. Room Viewer Standard

Room Viewer Standard is for corporate, association and independent meeting professionals, who do at least 10 medium-sized or large events per year. Perfect for facilities with meeting spaces that are 90% rectangular and only use standard furniture.

### II. Room Viewer Pro

This high-powered product is essential for facilities, event planners, caterers, audio visual and production companies, which rely on a detailed schematic of event space. Room Viewer is also highly useful to event planners, who do more than 10% of their events in odd-shaped spaces to create customized shapes.

In addition to containing an interface for add-ons, Room Viewer Pro contains the Room Viewer Shape Editor that offers users the ability to create custom shapes. Whether it's a new table, projector or screen, chair type, prop or some other specialty shapes, users can draw it by themselves. These intelligent shapes contain information, such as throw distance for new projectors and distance between tables for new rounds.

# 3

## Add-on products

### Advanced Audiovisual Shapes

If you are an audiovisual or production company, these shapes are for you. There are over 160 shapes included, some of which are 10-foot truss pars, lekos, mixer board, projection stands, technician, video rack, amp rack, video camera, follow spot, standing microphone, I-beam, Cyberlight, scaffolding, Mac500, Xenon and LCD projectors.

### Catering Shapes

Room Viewer can assist caterers and special event planners in showing their clients individual table settings, as well as buffet serving table settings. Included in this package are 166 on-and-off-premise catering shapes. Among these shapes are plates, salad bowls, samovars, bread baskets, platters, barbeque grills, bar accessories, chafers, and others.

### Buffet Line Shapes

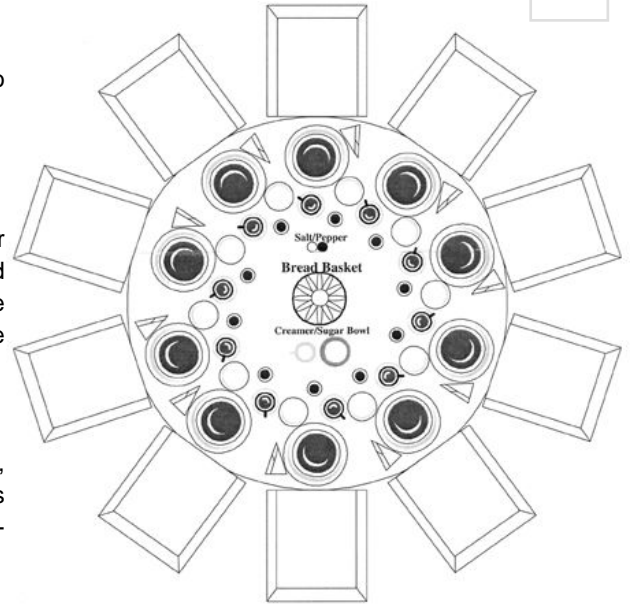

This package includes buffet table combinations created using serpentines, rounds, quarter rounds, half rounds and rectangular tables. With 37 shapes available, event planners, caterers and hotels can choose the best pre-constructed serving line for their needs.

### Game Shapes

If you are a company that rents inflatables and games or a planner who does outdoor game events, these shapes are for you. There are a total of 57 shapes, which include bounce house, bungee run, carnival tent, air hockey, fly trap, Ellie the elephant, golf driving range, keg racers, sumo wrestling, obstacle course, mountain, microreality race track, slide, trampoline and water wars.

### Casino Shapes

These beautifully designed color casino shapes are created for casino companies and special event planners. The package's 27 shapes include Poker, Blackjack, Roulette (single and double), Baccarat (full and mini), Money Wheel and Craps tables.

## The Room Schematic™

Room Schematic™ is an optional enhancement to Room Viewer® Pro. It offers users the ability to create permanent schematic drawings of event spaces. Whether the spaces are indoors or outdoors, these schematics include not only the boundaries of space but any permanent features, such as outlets, doors, windows, columns, posts, pools, trees and others.

It is a non-CAD add-on that lets you draw and connect lines and curves to create the boundaries of space. Also, you can position light switches, electrical outlets and sound outlets or indicate the position of airwalls.

Schematics that are made using this software contain only one enclosed space, which Room Viewer can automatically set. However, you can also create schematics to include pre-function areas and other rooms. These additional areas can be set manually within the Room Viewer's Event Editor.

In the Room Viewer Pro, these schematics are stored in the Room Name drop down list under the Event Room Data screen's Seating Tab. Simply click on the schematic you wish to use and Room Viewer Pro generates diagrams that will automatically avoid obstacles, while staying within the boundaries of space.

# 4

## Systems Requirements

Room Viewer requires at least a Pentium 200 PC with 16MB memory. Room Viewer Standard and Pro run on Windows 95, Windows 98, Windows NT and Windows 2000.

### The Room Viewer Pro Network works with:

Novell versions 4.x and 5.x

Windows NT Workstation and Server version 4.X or higher

OS/2 and MS-DOS

Workstations that run on Windows 95, Windows 98, Windows NT or Windows 2000

## Evaluation or Demo Software

The evaluation copy or demo software of Room Viewer runs on Windows 95, Windows 98, Windows NT and Windows 2000.

The evaluation software gives you the opportunity to work with the actual product. The **Room Viewer Pro** demo software can be downloaded at the NexC web site: <http://www.nexc.com>.

## NexC can create your function room templates

NexC can handle the drawing of your schematics. Charges are based on the number and size of rooms. For inquiries about NexC support services for Room Viewer, you can e-mail: [info@nexc.com](mailto:info@nexc.com)

### What we require from you?

- q Accurate floor plan with measurement either in metric or imperial measurement system
- q Information of all outlets, doors, columns, partitions stage, and the likes
- q Information on walls with special shapes, obstacles, and the likes
- q Areas including pre-function, lobby, corridor or outdoor spaces
- q Information of areas directly connected to the event room
- q Any fixed features like plants, furniture or artifacts that are permanently in the area

## About NexC

Since its inception in 1995, NexC has been in the forefront of establishing a global hospitality communications network that caters to the specific needs and requirements of the hospitality, travel, trade and tourism industries, as well as educational institutions. NexC provides a common virtual platform for these sectors to allow establishments, companies and individuals to interact, as well as dynamically exchange information and services. NexC provides the infrastructure for which this community can flourish and build its own worldwide knowledge base.

NexC's suite of services and features are geared towards nurturing business relations and people. Among these services are: JobMart, TradeMart, NexC Memberships, NexChange and Industry-related Directories.

It is this focus on a "people-to-people" network that fuels our desire to provide the best possible service we can give.

NexC... beyond time zones, truly global
